

QUARTERLY STATISTICAL HIGHLIGHT

QUARTERLY STATISTICS ON CIVIL ACTIONS (2007 – 2021)

Pending² civil actions¹ and clearance rate³ – Quarterly evolution

In the third quarter of 2021, the number of pending civil actions has increased by 1.2%, in view of the third quarter of 2020. When compared to the second quarter of 2021, the number of pending civil actions in the third quarter of 2021 has increased by 5.9%. On 30 September 2021, the number of pending civil actions was 138.757 (table 1).

Table 1 - Pending civil actions, consecutive quarters

The clearance rate (**table 2**), that measures the capacity of the system on a given moment to face the demand verified on that same moment, was of 78.8% in the third quarter of 2021. This result has the effect of the increase observed in the pendency at the end of this quarter. In the third quarters of 2020 and 2021, the period when judicial holidays occur, the clearance rate was under 100%.

Table 2 - Clearance rate of the civil actions, consecutive quarters

Pending civil actions, clearance rate and disposition time⁴ – Similar periods

Between the third quarter of 2007 and the third quarter of 2021 there was an accumulated decrease of 49.7% in the number of pending civil actions. In the similar periods corresponding to the third quarters of the years 2013 to 2021 a cumulative decrease of 46.4% was observed in the number of pending civil actions. Between the third quarter of 2020 and the third

quarter of 2021, there was an increase of 1.2% in the number of pending civil actions (**table 3**).

Table 3 - Pending civil actions, 3rd quarter

In the third quarter of 2021, the clearance rate was 78.8%, an increase of 3.8 percentage points when compared to the minimum value of 75.0% recorded in the third quarter of 2013 (**table 4**).

Table 4 - Clearance rate of the civil actions, 3rd quarter

The calculation of the disposition time in the third quarter of 2019, was affected by the unusually high number of completed cases in that quarter, as a result of internal transfers arising from the application of Decree-Law 38/2019, of 18 March,

which carried out a reorganisation of the 1st instance judicial courts (**table 5**), similarly to what happened in the third quarter of 2014 when Law 62/2013, of 26 August (Law on the Organisation of the Judicial System) came into force.

Table 5 - Disposition time (in days) of the civil actions, 3rd quarter

New and completed civil actions and procedural balance – Similar periods^{5 6}

In the third quarter of 2019, the number of new and completed civil actions was unusually high, a consequence of the application of the aforementioned diploma, which carried out a reorganisation of the 1st instance judicial courts. In the third quarter of 2021, the number of completed civil actions was lower than the number of new civil actions (**table 6**).

Table 6 - New and completed civil action 3rd quarter

As a result, the procedural balance in the third quarter of 2021 was unfavourable, corresponding to 7.773 more cases (**table 7**).

Table 7 - Procedural balance of the civil actions, 3rd quarter

Average duration⁷ of completed civil actions – Similar periods

Regarding the average duration of completed civil actions in the third quarters between 2007 and 2021, it is possible to observe that the

value has ranged between 11 and 29 months. In the third quarter of 2021, when compared to the third quarter of 2007, there was a decrease of 17 months in the average duration of completed civil actions (going from 29 to 12 months). Considering the previous similar period of 2020, in the third quarter of 2021, there was an increase of 1 month in the average duration of competed civil actions, from 11 to 12 months (**table 8**).

Table 8 - Average duration (in months) of the civil actions, 3rd quarter

sundry judicial notifications and 4.4% to interim measures (**table 9**).

Table 9 - Distribution of the type of completed civil actions - 3rd quarter

Distribution of the type of completed civil actions – third quarter of 2021

Considering the distribution of the type of completed civil actions in the third quarter of 2021, it is possible to assert that 36.5% corresponded to declarative actions, 9.3% to credit claims, 7.2% to seizures/objections, 4.5% to divorce and separation proceedings, 5.1% to

Footnotes

¹ In the current statistical highlight, the civil actions do not comprise the enforcement actions, the bankruptcy, insolvency and company rescue cases, the special revitalization procedures and the special procedures for payment agreement, given that the behaviour of these types of cases has been subject to analysis in autonomous quarterly statistical highlights (see quarterly statistical highlight 97 on civil enforcement actions and statistical highlight 96 on bankruptcy, insolvency and company rescue cases, on special revitalization procedures and on special procedures for payment agreement).

² Pending cases correspond to cases that have not yet had a final decision, judgment, sentence or order, in their respective instance, regardless of res judicata. These are cases that are waiting for acts or diligences to be carried out by the court, by the parties or by other entities. In certain types of cases, they may also be waiting for certain facts to occur or for a time period to run out. A suspended case is, for instance, a pending case, irrespective of the cause of suspension. A pending case is not necessarily a delayed case, as it may be a case that is running within the legal timeframes.

³ The clearance rate corresponds to the ratio of the total volume of completed cases over the total volume of new cases. If equal to 100% the volume of new cases is equal to the completed ones, being the variation of the pendency zero. If greater than 100%, there is a recovery in the pendency. The higher this indicator is the higher the recovery in the pendency in that year. If less than 100%, the volume of new cases is higher than the completed ones, generating pendency for the following year.

⁴ The disposition time is an indicator that measures, in days, the time that would be required to complete all the cases that are pending at the end of a specific period based on the rate of work done in that same time period, i.e., the number of completed cases in this period. Applied to a quarter, this indicator multiplies by 91.25 (average number of days in a quarter) the total of pending cases at the end of the quarter divided by the total number of completed cases during that same period of time.

⁵ In the 15 fourth quarters of 2007 to 2021 were registered, respectively, 52.162, 43.774, 49.294, 43.210, 41.315, 42.869, 44.834, 282.885, 35.104, 42.356, 36.006, 38.557, 44.186, 37.744 and 36.730 new civil actions and, also respectively, 54.338, 35.950, 39.501, 34.205, 35.000, 35.044, 33.631, 268.484, 34.450, 33.642, 30.225, 30.883, 37.634, 31.124 and 28.957 completed civil actions. However, from these totals, only 32.980, 41.302, 44.828, 40.734, 38.760, 40.532, 42.653, 38.078, 32.429, 39.968, 34.103, 36.211, 37.155, 35.328 and 34.608 new civil actions and 35.156, 33.478, 35.035, 31.729, 32.445, 32.707, 31.450, 23.677, 31.775, 31.254, 28.322, 28.537, 30.603, 28.708 and 26.835 completed civil actions correspond to actual movements of beginning and end of the cases. The remaining 19.182, 2.472, 4.466, 2.476, 2.555, 2.337, 2.181, 244.807, 2.675, 2.388, 1.903, 2.346, 7.031, 2.416 and 2.122 cases do not correspond to new civil actions or to civil actions that have been completed. These numbers on new and completed cases refer to the total of civil actions that have run internally between organic units/courts. They are not thus cases that have re-entered the justice system but cases that were completed in the organic unit/court from where they left and that have entered the organic units/courts to which they were transferred.

⁶ The procedural balance corresponds to the difference between new and completed cases. If positive, there is an increase in the pendency. If negative, there is a decrease in the pendency.

⁷ The average duration of a completed case in court corresponds to the period of time between the day in which the case began in the court first seized and the day it was completed, even if re-distributed, that is, between the day the case began in the court where it entered and the day it was completed in that same court or in any another court to which it has been redistributed. The concept of average duration used in this statistical highlight corresponds to the so-called duration of the initial case, to which the duration in the various courts where it has run is added.

Framework note – Time scope and other considerations

From 2007, the statistical data related to the cases in the first instance courts are directly gathered from the courts' computer system. Thus the present procedural situation corresponds to the cases that are recorded in this system. In the new and completed cases are included those that were transferred between organic units as a result of extinction and creation of new courts or sections.

Technical sheet:

The Directorate-General for Justice Policy (DGPJ) of the Ministry of Justice, in accordance with Article 2 (1) of Decree-Law 163/2012 of 31 July has the mission to give technical support within the scope of legislative production and legal assessment, to monitor the policies and the strategic planning for the sector, to coordinate the external affairs and the cooperation in the justice area, being also responsible for the statistical data in the Ministry of Justice.

Law 22/2008 of 13 May defines the basic general guidelines and principles that govern the National Statistical System (SEN), particularly with regard to the delegation of powers of the National Statistics Institute (INE), in other entities.

Under the provisions of Article 24 of Law 22/2008, of 13 May, a protocol was celebrated empowering the DGPJ with the production and dissemination of the Justice official statistics.

As a delegated entity, DGPJ is subject to compliance, in its relevant part, with the Law 22/2008, of 13 May, with the Decree-Law 166/2007, of 3 May, as well as with the rules established by Community legislation, adopting the Code of Conduct for European Statistics and the Regulation for the Application of the Principle of Statistical Confidentiality of the National Statistical Institute.
